

ERINA DALIPI

Computer Science Student

ABOUT ME

I am a Computer Science student with a strong interest in web development, SEO, and digital marketing. I enjoy building websites and learning how they can be optimized for search engines using structured content, HTML, and data-driven thinking. My goal is to develop practical experience in SEO and web analytics through real-world projects.

PROJECTS

Library Management System (C++)

Built a console-based program using OOP principles like classes and inheritance. demonstrates problem-solving and structured thinking (useful for data-driven SEO tasks)

Personal Portfolio Website (HTML, CSS, JS)

Developed a responsive personal website showcasing skills and interests. Focused on responsive design and clean structure for better usability

Restaurant App (Python GUI)

Built during a Junior Python Developer course, this application features a simple GUI for displaying the menu and managing customer orders efficiently, ensuring a smooth and intuitive user experience.

Dermatology Clinic Database System

Designed a relational database system for a dermatology clinic covering patients, appointments, medical history, and billing. Created ER diagrams, relational schema, SQL queries, and a simple MS Access user interface.

COURSES & CERTIFICATES

Junior Python Developer (Online Course, 2025)

Basic Rules of Cyber Hygiene-CRDF Global (Issued 14 Dec 2024)

Certificate of Participation-Summer Camp 2023, SEEU

Third Place Award-Bussiness Plan Competition, SEEU (2023)

INTERESTS

- Interests: Software Development, Web Design, Cloud Computing, Artificial Intelligence
